

“II International Symposium on Organometallic Chemistry: Transition Metal Carbenes and C—H Activation”

S e v i l l a

6th of September 2010

Instituto de Investigaciones Químicas

SCIENTIFIC PROGRAM

9:00-9:10	<i>Welcome and Opening Remarks</i>
9:10-10:10	Maurice Brookhart University of North Carolina, Chapel Hill <i>"Structure, Dynamics and Chemistry of Late Transition Metal Complexes of Silanes and Alkanes"</i>
10:10-11:00	Pedro J. Pérez Universidad de Huelva <i>"Strategies for the Catalytic Functionalization of Unreactive Carbon-Hydrogen Bonds"</i>
11:00-11:20	<i>Coffee Break</i>
11:20-12:10	Miguel A. Sierra Universidad Complutense de Madrid <i>"The Quest for New Organic Reactivity Using Two or More than Two Transition Metals"</i>
12:10-13:10	Robert G. Bergman University of California, Berkeley <i>"Selective Stoichiometric and Catalytic Reactions in Water Soluble Host-Guest Supramolecular Systems"</i>
13:10-13:20	<i>Closing</i>
